Cardinal Shrub Blooms Spring and Autumn

One of the newer shrubs. It is rapidly becoming the most widely planted shrub in America. The reason is because it thrives in the East, the West, the North and the South. In May-June the bushes are covered from top to bottom with hundreds of the lovely, rosy red flowers, trumpet shaped, 1 1/4 inches across. Easy to grow and not particular to soil. It will thrive in full sun or part shade. If planted this spring it will bloom this season. Very hardy, having withstood 15° below zero without injury.

The Favorite Climbing Rose

PAUL'S SCARLET

Blooming Size Plants

This is a very good variety if you are interested in climbing roses. In blooming season, the plants are blanketed from top to bottom with large, double scarlet blooms, almost covering the foliage of dark green leathery leaves.

Paul's Scarlet is the most popular of all climbing roses, not only because of its bright beauty, but because, wherever climbing roses do well, Paul's Scarlet thrives. No plant could attain and hold the popularity that Paul's Scarlet has unless it performed faithfully in many different areas over a period of many years.

Buy a pair and plant one on each side of the porch entrance, or on each side of a trellis. Or buy several and plant them at 6 foot intervals along a fence or wall—that makes a sight beautiful to behold.

NEW FIRE KING LILY

The most beautiful true fiery red Lily we have ever seen. A tremendous number of large out-facing blooms, flecked with black dots open over a period of 3 weeks during June and July. A clump of Fire King in bloom can be seen for a great distance. Plants with somewhat flattened wiry stems, grow 3 to 4 ft. As many as 60 to 80 blooms per stem is not uncommon on established plants. A Dutch gardener noticed this new Lily in his bulb beds and later named it Fire King to describe its color.

(Plant Patent No. 836)

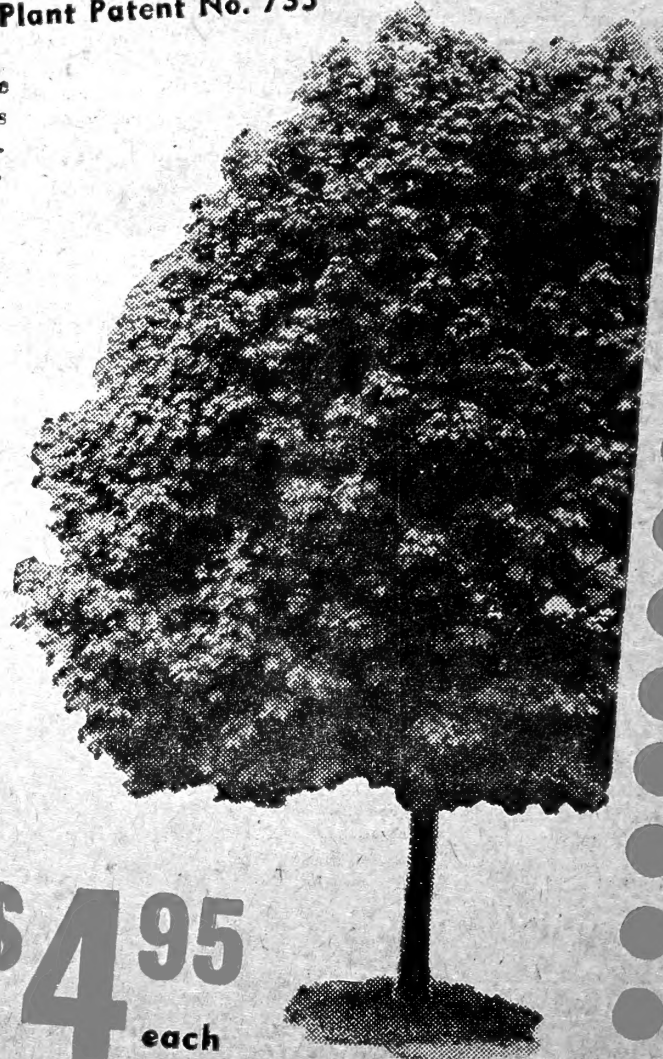

This sensational new shade tree perfectly fills the needs of today. Provides good shade quicker than any tree we know of. Is hardy, drought-resistant, and grows successfully on a wide range of soils. No unsightly seed pods. Finely cut foliage allows enough light to reach lawn to promote growth, yet provides enough shade to discourage crab grass. Develops a large, beautifully shaped head.

The Aristocrat of SHADE TREES

CRIMSON KING MAPLE

The Aristocrat of Ornamental and Shade Trees
Plant Patent No. 735

You will want to be one of the first to own this new tree. It is a beautiful form of Schwedler Maple, originating in Europe. Like the Schwedler it develops a rounded compact top of unusual symmetry, but differs in having foliage of deep purple-crimson all through the growing months. Crimson King has been under close observation in this country for 10 years, and in every instance has kept its rich coloring throughout the season. It has been said "The Crimson King is beautiful beyond words." Grows 25-40 ft. tall.
